Dear Sirs

7,607 Affordable Housing units owned by Loretto, Wheatley Homes East and Wheatley Homes Glasgow in connection with the issue of Wheatley Group Capital plc's £100,000,000 4.375 per cent. Secured Bonds due 2044 (the "New Bonds") (to be consolidated and form a single series with the £300,000,000 4.375 per cent. Secured Bonds due 2044 (together with the New Bonds, the "Bonds"))

We are pleased to attach this report in connection with the above.

If you have any questions about this report or require any further information, please contact Allan Briggs MRICS (Allan.Briggs@jll.com; 0131 243 2207).

This report is issued for the benefit and use of the addressees and for inclusion in the prospectus for the issue of the New Bonds (the "Prospectus" and the "Bond Issue") and may only be used in connection with the Prospectus and the Bond Issue. We hereby give our consent to the publication of this report within the Prospectus and accept responsibility for the information contained in this report.

Having taken all reasonable care to ensure that such is the case, the information given in this report is, to the best of our knowledge, in accordance with the facts and contains no omission likely to affect its import.

Before this report or any part of it is reproduced or referred to in any document, circular or statement (other than the Prospectus in respect of the Bonds), our written approval as to the form and context of such publication must be obtained.

Yours faithfully

Yours faithfully

Executive Summary

This summary should be read in conjunction with the main body of this report. Section numbers are supplied where relevant.

Introduction

The date of this report is 11 March 2025.

Jones Lang LaSalle Limited has been instructed to value a portfolio of 7,607 properties for loan security purposes.

The Issuer will issue £100,000,000 4.375 per cent. Secured Bonds due 2044 (the "New Bonds") (to be consolidated and form a single series with the £300,000,000 4.375 per cent. Secured Bonds due 2044 (the "Original Bonds" and, together with the New Bonds, the "Bonds")) on or about 13 March 2025 (the "New Bond Issue Date") and will immediately repurchase the New Bonds on the New Bond Issue Date (as such, the "New Retained Bonds") and will on-sell them to one or more investors at a later date. The net proceeds of the sale of the New Retained Bonds to a third party (after deduction of expenses payable by the Issuer) will be advanced by the Issuer to the Group Borrower pursuant to a loan agreement dated 28 November 2014 as supplemented on or about the New Bond Issue Date (the "Loan Agreement") and the Group Borrower will, in turn, on-lend such funds to the Existing Borrowers pursuant to their respective intra-group facility agreements. The obligations of the Group Borrower under the Loan Agreement will be secured by Loretto Housing Association Limited ("Loretto"), Wheatley Homes East Limited ("Wheatley Homes East, the "Chargors") charging the properties which are the subject of this report in favour of the Security Trustee for the benefit of, among others, the Issuer.

Properties

The portfolio comprises 7,568 social housing units located throughout the Scottish central belt with the largest cluster in and around Glasgow.

The portfolio contains a mixture of different tenures as summarised in the table overleaf and set out in greater detail in section 3 of this report.

In addition, there are 39 units in the portfolio which form ancillary accommodation. The Chargors' interest in these units is considered to be de minimis for the purpose of this exercise and so they have been included at nil value. Furthermore, please note that these properties have not been included in any unit counts or other statistics in this report.

We have inspected the exterior of all units in the portfolio and have seen a representative sample of 5% internally (section 2). The inspections were undertaken between 3 June 2024 and 6 December 2024.

We have assumed that the Chargors hold Heritable interests (Scottish equivalent of English freehold) in these properties.

Valuations

The valuation date is 11 March 2025.

Our valuation of the 3,417 properties being valued on the basis of Existing Use Value for Social Housing ("EUV-SH"), in aggregate, at the valuation date is:

£159,210,000

(one hundred and fifty nine million, two hundred and ten thousand pounds)

Our valuation of the 4,151 properties being valued on the basis of Market Value subject to Tenancies ("MV-T" and the "MV-T Properties"), in aggregate, at the valuation date is:

£316,120,000

(three hundred and sixteen million, one hundred and twenty thousand pounds)

For information purposes only, our valuation of the MV-T Properties valued on the basis of EUV-SH, in aggregate, at the valuation date is:

£231,070,000 (two hundred and thirty one million and seventy thousand pounds)

The following table summarises our opinions of value (section 6):

Chargor	Basis of Valuation	Units	EUV-SH	MV-T
Loretto	EUV-SH	546	£27,780,000	-
Loretto	MV-T	1,166	-	£77,550,000
Wheatley Homes East	EUV-SH	20	£790,000	-
Wheatley Homes East	MV-T	272	-	£22,820,000
Wheatley Homes Glasgow	EUV-SH	2,851	£130,640,000	-
Wheatley Homes Glasgow	MV-T	2,713	-	£215,750,000
Total		7,568	£159,210,000	£316,120,000

Portfolio Analysis

Strengths:

- portfolio located throughout Scottish Central Belt;
- well managed portfolio by Wheatley Group and their subsidiaries;
- given the divergence between property prices and local average earnings, demand for these properties should be sustainable in the medium to long term;
- the level of rental income is generally lower when compared with other Registered Social Landlords ("RSLs") with stock in the area;

- recent JLL stock validation exercise agrees with at least 97% of the information contained within the Wheatley
 Housing Groups inhouse property management system in terms of main component replacement items and
 cost estimates;
- the level of rental income is, in aggregate, below the relevant levels of Local Housing Allowance (LHA) for each region and tenure type;
- No Right to Buys in Scotland;
- the EUV-SH and MV-T values per unit and percentage relationships to MV-VP, are at levels appropriate to the current climate, having regard to the portfolio's location and composition;
- there are currently c. 244,000 people in Scotland that are waiting for council or social housing, up from 108,000 in 2016; and
- EUV-SH values are likely to maintain their current levels as stock transactions within the sector and access to debt markets continue to take place, albeit with more hesitancy due to market fluctuations.

Weaknesses:

- the age of the properties mean they require continued investment in order to be able to maintain the same level of rental income in the long term;
- possible downward pressure on house prices in the medium-term and falling transaction volumes could impact upon values going forward; and
- there are short-term risks for RSLs' income not supported by housing benefit and a greater number of voids and arrears.

Opportunities:

- increased efficiencies driven by mergers between housing associations;
- rationalisation of RSLs' stock allowing for more efficient asset management;
- investment of REITs and other funds into the sector as whole; and
- reactive changes to working conditions and government policy could drive further efficiencies in the sector and wider economy in the longer-term.

Threats:

- RSLs' spending on repairs and maintenance is at record levels and development plans are being scaled back due to financial constraints;
- changes in government policy such as a period of rent cuts or changing the Rent Regime to CPI only or rent freeze;
- as a result of the Hackitt Review and the subsequent conclusion Grenfell enquiry and other influences, the social housing sector is undertaking extensive investigations and works around fire and building safety, and the required scope of such works might change over time;
- the ongoing Ukraine and Middle East crises are having an effect on global markets;

• elevated UK borrowing costs having hit their highest levels 1998 in the second week of January 2025 and its effect on the forthcoming budget setting for RSLs.

Suitability of Security

Your instructions require us to comment on whether the properties we have valued provide adequate security for the issue.

It is difficult for any valuer, without being asked to consider a specific credit or risk assessment policy, to make an absolute, unqualified statement that those assets will provide suitable security because our instructions do not explain what criteria the Security Trustee is applying in making this assessment.

However, we confirm that, in our opinion, should the Security Trustee become a mortgagee in possession of this portfolio of properties, then it would be possible to achieve a sale to another RSL that would be at a price at least equivalent to our valuation on the basis of EUV-SH or, in principle, to a private purchaser at a price equivalent to our valuation on the basis of MV-T as set out in this report. However, the valuation assumes implicitly that a purchaser could obtain debt finance on commercially viable terms to facilitate a purchase of the portfolio.

There are 2,321 units in the portfolio that are located within multi-storey blocks, 56 units in deck access and 63 post 1946 tenement blocks of 11m or 5 storeys and above in height. We understand that these blocks have all been reviewed by the Chargors and Fire Risk Assessments been carried out where necessary.

The Chargors have confirmed that none of the blocks have ACM, MCM or HPL cladding systems and any outstanding fire safety works have already been factored into the cost assumptions.

With the above factors in mind, and with specific regard to the continuing need for well-maintained social housing accommodation, we believe it reasonable to conclude an acceptable demand for a portfolio of this nature from commensurate RSLs and private institutional investment firms.

Subject to the information presented within this report, and at the values formally reported, we are satisfied to recommend to the Security Trustee that this portfolio is suitable for security purposes.

Stock

The stock is summarised by count of unit type as follows:

Archetype	Rooms / Studios	1	2	3	4+
Aged Persons Flat	292	-	-	-	-
Bungalow	-	17	13	3	1
Deck Access Flat	100	201	88	59	-
Flat	25	499	930	65	4
High-Rise Flat	-	762	1,559	-	-
House Detached	-	-	3	4	3
House Semi-Detached	3	4	228	255	55
House Terraced	8	30	395	350	140
Main Door Flat	31	268	700	287	1

Archetype	Rooms / Studios	1	2	3	4+
Room	123	62	-	-	-
Total	582	1,843	3,916	1,023	204

Assumptions: Rented Properties

The following table provides a summary of the assumptions made in our rented valuations:

Assumption	EUV-SH	MV-T
Discount rate – rental income	5.75% - 6.50% (10.00% - 15.00% for the Care Homes and Homelink units)	7.50% - 10.00%
Bad debts and voids – year 1	1.25% - 3.50%	5.00%
Management costs – year 1	£700 - £750 (£500- £1,100 for the Care Homes and Homelink units)	8.0% of Gross Income
Additional service costs – year 1 (Where applicable)	£104 - £841	£104 - £841
Major repair and renewal costs – year 1	£0 - £32,725 (£3,826 average)	£0 - £32,725 (£3,826 average)
Cyclical repairs – year 1	£400 - £450	£400 - £450
Day-to-day repairs – year 1	£500 - £750	£550 - £800
Real rental growth year 1	0.5%	Capped at 20%
Average 30 year spend per unit	£37,255	£37,130

Assumptions: Shared Ownership

The following table provides a summary of the assumptions made in our shared ownership valuation:

Assumption	EUV-SH
Real rental growth year 1	0.5%
Gross Initial Yield	5.50%

This summary should be read in conjunction with the remainder of this valuation report and must not be relied upon in isolation.

1

1 Introduction

1.1 Background

Jones Lang LaSalle Limited (hereafter "JLL") has been instructed to prepare a valuation of 7,607 properties owned by the Chargors, being subsidiaries of Wheatley Housing Group Limited.

1.2 Compliance

Our valuations have been prepared in accordance with the current RICS Valuation – Global Standards, incorporating the IVS, and the RICS Valuation – Global Standards – UK National Supplement published by the Royal Institution of Chartered Surveyors (commonly known as the "Red Book").

Our valuations may be subject to monitoring by the RICS and have been undertaken by currently Registered RICS Valuers.

This report has been prepared by Allan Briggs MRICS (Valuer Number: 1120141) and Geoff Ferguson (Valuer Number: 5608880) who are both Directors of JLL. In addition, this report has been countersigned by Marc Burns Co-Head of Affordable Housing Loan Security Valuation and Richard Petty FRICS (Valuer Number: 0089005), Head of Affordable Housing at JLL, both are Directors of JLL.

In accordance with PS 2.3 of the Red Book, we confirm that we have sufficient knowledge and skills to undertake this valuation competently.

We can confirm that no conflict of interest has occurred as a result of our production of this report.

The valuation date is 11 March 2025.

For the avoidance of doubt, we confirm that it would not be appropriate or possible to compare this valuation with any values appearing in the Chargors' accounts. This report has been prepared in accordance with the Red Book. The valuations are prepared on this basis so that we can determine the value recoverable if the charges over the properties were enforced at the date of this report. We understand that values given in the Chargors' accounts are prepared on an historic cost basis which considers how much the properties have cost and will continue to cost the Chargors. This is an entirely different basis of valuation from that used for loan security purposes.

This valuation qualifies as a Regulated Purpose Valuation ("RPV") as defined by the Red Book. A RPV is a valuation which is intended for the information of third parties in addition to the Addressees. It is a requirement of UKVS 4.3 of the Red Book in relation to disclosures that we declare our prior involvement with the Chargors, or the properties being valued, to ensure that there is no conflict of interest.

We confirm that the total fee income earned from the Chargors is substantially less than 5% of the fee income earned by JLL in our last financial year (ending 31 December 2024) and that we do not anticipate this situation changing in the foreseeable future.

1.3 Instructions

This report is prepared in accordance with the Chargors' formal instructions.

We have been instructed to prepare our valuations on the following bases:

- Existing Use Value for Social Housing ("EUV-SH"); and
- Market Value subject to existing Tenancies ("MV-T").

Please note that the properties that have been valued on the basis of MV-T have also been valued on the basis of EUV-SH, for information purposes only.

1.4 Status of Valuer

In preparing this report, we confirm that JLL is acting as an external valuer as defined in the Red Book. We can also confirm that we consider ourselves to be independent for the purposes of this instruction.

In accordance with RICS guidance, and our own rotation policy, we recommend that a rotation of overall responsibility within JLL is considered no later than the end of 2030.

1.5 The Stock Rationalisation Market – EUV-SH Transactions

As you will be aware, an active market exists for the sale of tenanted stock between English Registered Providers of Social Housing ("RPs"). This can be driven by strategic decisions about the type and location of accommodation that RPs wish to provide, and the viability of investing in properties to bring them up to the required standards.

Where competition is generated, a market has emerged in which housing associations bid against one another on price. The resulting values, even though presented on an EUV-SH basis, tend to be in excess of base EUV-SH values that might be expected for balance sheet or loan security purposes.

Although this may appear hard to justify, the underlying rationale is as follows:

- the bidding price is still much less than the cost of development;
- the marginal cost of taking additional units into management, in an area where the acquiring RP already has stock, justifies a financial model based on relatively low costs for management, repairs and maintenance;
- the judgement of all-round risk formed by the acquiring RP, as reflected in the discount rate, is often lower (and the rate therefore keener) than would be acceptable to either a funder or an auditor in a balance sheet context;
- the price is worth paying to achieve strategic objectives around increasing a presence in a particular area or market; and/or
- the price may be supported by future void sales and/or changes of tenure (for example, from Social Rent to Midmarket rent).

In addition, Scottish RSLs have, over the last 5 years, successfully engaged with private residential developers throughout Scotland in acquiring the S.75 restricted stock within larger private developments. In the majority of the cases (not including Local Authority/Council developments) this has been funded through a combination of Affordable Housing Supply Programme grant ("AHSP"), private finance and internal RSL cross subsidies and all ultimately based on an EUV-SH valuation plus AHSP grant.

2 Methodology

2.1 Valuation Model

We have undertaken our valuation of the portfolio using fully explicit discounted cashflow models, over a 50-year period, with the net income in the final year capitalised into perpetuity.

For the purposes of our valuation, we have split this portfolio by tenure in order to reflect the different risks and opportunities associated with each business stream.

In accordance with section 1.5, whilst we recognise that there is a growing active market for the sale of tenanted stock between RPs, we have not split the portfolio into 'lots' to reflect this and have, in accordance with our instructions, valued the properties as a single portfolio.

Against the income receivable for each property, we have made allowances for voids and bad debts; the costs of management and administration; major repairs; cyclical maintenance; day-to-day repairs; and for future staircasing. We have assumed an appropriate level of future growth in these costs (expenditure inflation).

We have then discounted the resulting net income stream at an appropriate rate which reflects our judgement of the overall level of risk associated with the long-term income. A more detailed explanation of the discount rate is included in section 4.

2.2 Information Provided

The principal source of background data for the portfolio has been the rent roll for each property provided by the Chargors. This detailed the number and type of units, the rent payable, tenancy type, and equity retained by the association (where applicable).

We have also been provided with Stock Condition Survey data and a 30 year Planned Maintenance Programme for each of the properties by the Chargors and have had regard to these costs in our valuations.

This information was supplemented with our market research and other data we have gathered from similar instructions undertaken recently and involving comparable stock. From these sources we have collated information on the following:

- rents;
- bad debts, voids and arrears;
- cost of maintenance and repairs; and
- management and administration expenses.

A location plan of the portfolio is provided as Appendix 2.

2.3 Inspections

We derived our inspections strategy by giving full regard to:

- the geographical spread of the stock;
- the concentration (and thereby its exposure to risk); and

the property types.

We have satisfied ourselves as to the quality of location and the general condition of and level of fixtures and fittings provided to the properties, and we have derived our valuation assumptions accordingly.

In accordance with our instructions, we inspected the exterior of all units in the portfolio and seen a representative sample of 5% internally. The inspections were undertaken between 3 June 2024 and 6 December 2024.

A representative selection of photographs are provided as Appendix 3.

2.4 Market Research

In arriving at our valuation, we have undertaken a comprehensive programme of research to supplement our knowledge and understanding of the properties. This has included:

- researching local vacant possession values through conversations with local estate agents together with online research;
- examining local benchmark affordable rents and comparing these with the Chargors' rents; and
- analysing data provided by the Chargors.

3 General Commentary

There are 7,538 rented properties and 30 shared ownership properties in the portfolio.

Schedules summarising the following data for each property within the portfolio form Appendix 1 of this report:

- address;
- unit type;
- title number; and
- tenure.

The portfolio comprises different types of housing tenures as summarised in the table below:

Housing Provision	Loretto	Wheatley Homes East	Wheatley Homes Glasgow	Total
General Needs	1,440	292	3,150	4,882
General Needs Multi-Storey	-	-	2,293	2293
Shared Ownership	18	-	12	30
Sheltered	26	-	37	63
Sheltered High-Rise	-	-	28	28
Supported	229	-	43	272
Total	1,713	292	5,563	7,568

The supported properties comprise the following units:

- 95 rooms within Homelink properties, 18 supported self-contained flats owned by Wheatley Homes Glasgow and 1 supported self-contained flat owned by Loretto;
- 4 Glasgow Homeless Partnership ("GHP") properties and 23 alcohol related brain damage support units ("ARBD") owned by Loretto; and
- 3 supported schemes that are owned by Loretto and leased to other providers.

3.1 Leased Supported Schemes

We have previously been provided with signed copies of the leases for Wallace of Campsie House and William Hunter House, the terms of which are substantially the same and are summarised in the table overleaf. We have not been provided with the lease for Charles Brown House, which we understand is managed by Milnbank Housing Association, and therefore, for the purposes of this valuation, we have assumed that the lease is in the same form as the leases for Wallace of Campsie House and William Hunter House. We comment as follows:

Lease	Item	Terms
Wallace Campsie House	The Association:	Loretto Housing Association Ltd
	The Tenant:	Salvation Army Social Work Trust
	The Property:	50 self-contained flats
	Term:	10 years
	Commencement date	5 March 2012
	Term remaining:	TACIT
	Termination of lease:	Failure to perform various duties under the terms of the lease, by signing an amended lease or by agreement of the Association and Tenant
William Hunter House	The Association:	Loretto Housing Association Ltd
	The Tenant:	Salvation Army Social Work Trust
	The Property:	22 self-contained flats and 15 bedsits
	Term:	3 years
	Commencement date	1 April 2017
	Term remaining:	TACIT
	Termination of lease:	Failure to perform various duties under the terms of the lease, by signing an amended lease or by agreement of the Association and Tenant

We have not been provided with current rents for Wallace Campsie House, William Hunter House and the ABDR unit. As such we have had regard to the previous year's rental income within our valuation calculations.

3.2 Locations & Property Types

The properties are all located across Scotland. A location plan of the portfolio is provided at Appendix 2.

The following table summarises the different property types within the portfolio:

Archetype	Rooms / Studios	1	2	3	4+
Aged Persons Flat	292	-	-	-	-
Bungalow	-	17	13	3	1
Deck Access Flat	100	201	88	59	-
Flat	25	499	930	65	4
High-Rise Flat	-	762	1,559	-	-
House Detached	-	-	3	4	3

Archetype	Rooms / Studios	1	2	3	4+
House Semi-Detached	3	4	228	255	55
House Terraced	8	30	395	350	140
Main Door Flat	31	268	700	287	1
Room	123	62	-	-	-
Total	582	1843	3,916	1,023	204

The properties within the portfolio are a mixture of ages and construction types as summarised in the table below:

Archetype	Pre-1919	1919-1945	1946-1979	1980s	1990s	2000s	Post 2010
Aged Persons Flat	-	-	269	-	-	-	23
Bungalow	1	1	-	-	6	26	-
Deck Access Flat	-	-	416	17	1	14	-
Flat	4	217	527	28	195	374	178
Multi-Storey Flat	-	-	2,321	-	-	-	-
House Detached	2	-	-	-	-	7	1
House Semi-detached	2	168	43	-	22	280	30
House Terraced	-	353	189	-	109	161	111
Main Door Flat	9	579	137	3	180	275	104
Room	52	5	-	-	107	21	-
Total	70	1,323	3,902	48	620	1,158	447

For the purposes of this valuation, we have assumed that the stock has continued to be maintained to the required standards outlined above.

Overall, we have assumed that each low-rise and medium-rise property have a useful economic life of 50 years and the high-rise properties a useful economic life of 30 years, providing that the properties are properly maintained in the future.

The property ages and construction methodology have been factored into the assumptions we have made regarding voids, discount rates, and repairs and maintenance.

3.3 Fire Safety

Our valuations have been provided in accordance with the RICS' Guidance Note: "Valuation of properties in multi-storey, multi-occupancy residential buildings with cladding, 1st Edition March 2021" (the 'Guidance Note'), effective from 5 April 2021.

The purpose of the Guidance Note is to help valuers undertaking valuations of domestic residential blocks of flats in the UK for secure lending purposes. It sets out criteria for buildings of different heights that can be used to identify

where possible remediation work to cladding for fire safety purposes is likely to be required and may materially affect the value of the property.

Building fire safety is fully devolved to the Scottish Government where requirements on building safety are primarily covered by the Building (Scotland) Act 2003, which introduced the Building (Scotland) Regulations 2004, and requirements on general fire safety are covered in the Fire (Scotland) Act 2005 supported by the Fire Safety (Scotland) Regulations 2006.

In 2017, the UK Ministry of Housing, Communities and Local Government identified 450+ residential buildings in England over 18m tall with aluminium composite material (ACM) cladding, and the number of potentially unsafe buildings is likely higher, with ACM cladding and other potentially unsafe systems existing on many other properties below 18m, with a loose estimate of more than 1,700 buildings. By contrast, only a handful of such properties were identified in Scotland. Whilst the situation is no less serious, the number of unsafe buildings is a fraction of those in England. This is because, following the fatal Garnock Court tower block fire in 1999, Scotland improved its fire safety regulations in 2005, making it mandatory for builders to ensure that any external cladding "inhibited" fire spreading.

These different starting points for building and fire safety in England and Scotland mean that the legislative and regulatory steps following on from Grenfell will differ.

There are 2,321 units in the portfolio that are located within high-rise blocks, 56 units in deck access and 63 units in post 1946 tenement blocks of 11m or 5 storeys and above in height. We understand that these blocks have all been recently reviewed by the Chargors and Fire Risk Assessments been conducted where necessary.

The Chargors have confirmed that none of the blocks have ACM, MCM or HPL cladding systems and any outstanding fire safety works have already been factored into our cost assumptions. In addition, we understand that the Chargors continue to monitor the position and work with Scottish Government regarding post Grenfell enquiries and recommendations.

With the above factors in mind, and with specific regard to the continuing need for well-maintained social housing accommodation, we believe it reasonable to conclude an acceptable demand for a portfolio of this nature from commensurate RSLs and private institutional investment firms.

3.4 Energy Performance Certificates (EPCs)

The Energy Efficiency Standard for Social Housing ("EESSH") was introduced in March 2014 and set a first milestone for social landlords to meet for social rented homes by 31 December 2020. A second milestone (EESSH2) was confirmed in June 2019, for social rented houses to meet by December 2032. The EESSH2 milestone is that all social housing meets, or can be treated as meeting, EPC Band B (Energy Efficiency rating), or is as energy efficient as practically possible, by the end of December 2032 and within the limits of cost, technology and necessary consent. In addition, no social housing below EPC Band D should be re-let from December 2025, subject to temporary specified exemptions.

The Chargors have confirmed the EPC rating applicable for this portfolio which are summarised in the table below:

EPC Rating	А	В	С	D	Е	F	G	Unknown
Total	-	876	6,204	440	6	-	-	42

We note that some of the properties have an EPC rating of D or lower which falls below the minimum EPC threshold required for lettings in the Scottish private rental market from 2025 (where feasible and cost-effective). However, we have valued these properties, on the basis of EUV-SH or MV-T (where appropriate) and we have made additional cost allowance (via adoption of the provided profiled planned LCC) in order that they can be brought up to the required standard.

3.5 Climate Change Risk and Net Zero Carbon

Global warming targets set in the Paris Agreement are 1.5-2.0° Celsius above pre-industrial levels. Even the lower end of this range will produce significant changes to global climate systems, including extreme heat or cold events, higher frequency and severity of precipitation or drought, and sea level rise. Therefore, the level of physical climate-related risk of the subject property is likely to fluctuate over its useful life. High levels of climate risk could affect occupier and investor demand, as well as ability to obtain building insurance.

There is an increased focus on Environmental, Social & Governance (ESG) criteria for investment across all asset classes, including real estate. There are also various new, ESG-focused funds entering the real estate market. As a result, the value of property assets of all types is likely to be increasingly affected over time by long term, sustainability challenges. We note that, under the Paris Agreement, the 2050 vision is for all buildings, both new and existing, to be net zero carbon across the whole life cycle. As an interim ambition, the agreement envisages that all new buildings should be able to achieve zero carbon in operations, and aim to reduce carbon emissions by 40%, by 2030,

To achieve the best sustainability credentials and, in particular, to achieve Net Zero Carbon specification, the cost of a refurbishment of a building is currently higher than it would be for a refurbishment which fell short of the standards. However, given the speed at which both the legislation and ESG requirements are advancing, there is a risk that, within the next ten years, further capital expenditure will be required. However, such costs may be mitigated in the future through the principles of the Circular Economy, with a greater focus on recycling materials, and the development of more flexible buildings which can be refurbished and adapted to alternative uses more economically.

Therefore, in terms of cashflow, we anticipate that the technological advances, combined with the increased supply of products and competition, will lower these costs over time and we have not, at this stage, included in our valuation any additional allowance for costs to support the move to net zero carbon over the period covered by our valuation models.

4 Valuation Commentary – Rented Stock

4.1 Introduction

There are 7,538 rented properties in the portfolio.

4.2 Tenancies

Unless otherwise stated, we understand that the general needs rented units are let on a Scottish Secure Tenancy Agreement, as created by the Housing (Scotland) Act 2001 and amended by the Housing (Scotland) Act 2014.

4.3 Leased Supported Properties

We have previously been provided with signed copies of the leases for Wallace of Campsie House and William Hunter House, the terms of which are substantially the same and are summarised in the table below. We have not been provided with the lease for Charles Brown House, which we understand is managed by Milnbank Housing Association, and therefore, for the purposes of this valuation, we have assumed that the lease is in the same form as the leases for Wallace of Campsie House and William Hunter House. We comment as follows:

Lease	Item	Terms
Wallace Campsie House	The Association:	Loretto Housing Association Ltd
	The Tenant:	Salvation Army Social Work Trust
	The Property:	50 self-contained flats
	Term:	10 years
	Commencement date	5 March 2012
	Term remaining:	TACIT
	Termination of lease:	Failure to perform various duties under the terms of the lease, by signing an amended lease or by agreement of the Association and Tenant
William Hunter House	The Association:	Loretto Housing Association Ltd
	The Tenant:	Salvation Army Social Work Trust
	The Property:	22 self-contained flats and 15 bedsits
	Term:	3 years
	Commencement date	1 April 2017
	Term remaining:	TACIT
	Termination of lease:	Failure to perform various duties under the terms of the lease, by signing an amended

	lease or by agreement of the
	Association and Tenant

We have not been provided with current rents for Wallace Campsie House, William Hunter House and the ABDR unit. As such we have had regard to the previous year's rental income within our valuation calculations.

4.4 Rental Income

The total gross rent receivable from the 7,568 rented properties in the portfolio, that we have been provided for 2025/26 amounts to £44,344,056 per annum / c. £5,859 pu per annum (based on a 52-week year). The average gross weekly rents are set out in the table below:

Bedroom Number	Loretto	Wheatley Homes East	Wheatley Homes Glasgow	Scottish RSL Ave.
1	£100.35	£90.67	£101.82	£93.93
2	£104.77	£101.14	£119.42	£96.52
3	£120.62	£111.65	£133.12	£105.08
4+	£212.68	£0.00	£145.81	£115.76

While providing a useful comparison, we would caution that this type of comparison excludes any 'weighting' for property age, type or condition. Please note that Wheatley Homes Glasgow's rental submissions to the Scottish Housing Regulator ("SHR") are gross of service charge.

While providing a useful comparison, we would caution that this type of comparison excludes any 'weighting' for property age, type or condition.

4.5 EUV-SH Rental Growth

RSLs in Scotland have in the recent past been under pressure to set rent levels in order to maximise private investment in new stock and to make full provisions for major repairs, particularly to older properties. Rental policies to address these problems have varied and, until recently, annual rent increases have tended to be at a level of inflation plus, but this is beginning to change as tenant affordability and reduced welfare payments become more of a factor.

We are also conscious that the policy on Housing Benefits remains the responsibility of Westminster and this needs to be taken into consideration when valuing rental income streams in Scotland. Whilst there are currently no centrally imposed restrictions on future annual rent increases for RSL stock in Scotland, any future changes in national housing policy may affect the ability for Scottish Social Housing providers to individually determine their future rent policy.

The ongoing Welfare Reform agenda announced by the UK Government is, in the short term, likely to restrict the increase in the level of financial support available to some tenants to less than the current level of inflation. Whilst this is a factor that will affect tenant affordability, there will be a continuing need for RSLs to adopt rent increases which complement their business plan requirements.

In our EUV-SH valuation, we have modelled the following within the valuation cashflows (noting our cashflows are net of inflation):

Tenure	Rent Increase Yr 1	Rent Increase Yr 2	Rent Increase Yr 3	Rent Increase Yr 4 Onwards
General Needs	1.00%	0.50%	0.50%	1.00%
General Needs Multi-Storey	1.00%	0.50%	0.50%	1.00%
Sheltered	1.00%	0.50%	0.50%	1.00%
Supported	1.00%	0.50%	0.50%	1.00%

4.6 MV-T Rental Growth

In our valuations on the basis of MV-T, existing social rents are uplifted to a level that reflects the local private rented market. Based on our knowledge of the area, we have increased existing social rents to a level that is closer to the levels achieved in the private lettings market, whilst having regard for the highest level of housing benefit available to claimants and capping our rents at the appropriate levels.

The UK Government's Welfare Reform Act 2007 changed the current housing benefit system for private sector tenants from April 2008 with Housing Benefit being replaced by the Local Housing Allowance. That is:

- paid directly to tenants rather than landlords in the majority of cases; and
- paid at fixed rates depending on the area and the household size, instead of directly related to the property involved.

The up to date weekly Local Housing Allowances for the various Broad Rental Market Areas ("BRMAs") that are decided by the Department for Work and Pensions ("DWP") using information provided by the Valuation Office Agency ("VOA") and which came into effect in April 2024, are shown below. LHA figures are updated annually, and these figures remain valid to at least 31 March 2025.

BRMA	1 bedroom	2 bedrooms	3 bedrooms	4 bedrooms
Ayrshires	£86.30	£109.32	£130.00	£184.11
East Dunbartonshire	£126.58	£172.60	£230.14	£322.19
Forth Valley	£105.86	£149.59	£184.11	£299.18
Greater Glasgow	£159.95	£195.62	£223.23	£414.25
North Lanarkshire	£101.26	£126.58	£155.34	£205.97
Renfrewshire/Inverclyde	£92.05	£120.82	£138.08	£253.15
South Lanarkshire	£103.56	£132.33	£164.74	£254.76
West Dunbartonshire	£109.32	£136.93	£155.34	£218.63
West Lothian	£115.07	£143.84	£172.60	£256.03

The following table sets out a comparison of the Chargors' average rents with the average LHA in the portfolio and, if applicable, also our opinion of Market Rents for comparable properties in the same areas (rents are shown on the basis of 52 weeks).

Property Type	Average Passing Rent	Average LHA	% of LHA
General Needs	£112.04	£177.81	63.01%
General Needs High-Rise	£119.13	£184.27	64.65%
Shared Ownership	£72.83	£150.43	48.41%
Sheltered	£100.04	£161.65	61.89%
Sheltered High-Rise	£106.90	£168.87	63.30%

^{*}note that supported rents are often stated gross of care and maintenance items.

The uplift in rents in the valuation has typically been introduced over a period of up to 6 years and, thereafter, the annual rent increase is assumed at 0.5% per annum in real terms.

Within this valuation, the cashflow assumptions for rent loss to voids & bad debts have been adjusted upwards to reflect the higher turnover and costs normally associated with market rented properties.

4.7 Relet Rates

Our EUV-SH model allows for a rate at which secure tenancies are re-let on an existing use basis. The annual rates of tenancy turnover experienced by housing associations vary considerably between localities and between different property types.

4.8 Sales Rates

In addition to preparing an Existing Use Valuation, our instructions also require a valuation based on Market Value subject to Tenancies, which makes the assumption that units that fall vacant can, where appropriate, be sold on the open market.

The Valuation assumes that there are no Section 75 Agreements, Nomination Agreements (or at least not binding to a mortgagee in possession or potential purchaser of the portfolio), or other restrictive covenants/agreements, which would prevent the sale of void units on the open market with vacant possession. For these rented units, the cashflow analysis shows a gradual reduction in stock numbers over a 50-year period down to a residual or rump level which is c. 25% of the opening stock level. The sale prices used within the valuations have been adjusted to reflect general wear and tear, and an allowance has also been made for marketing/selling costs and a period of rent loss.

4.9 Right to Buy

The Housing (Scotland) Act 2014 provides that right to buy ended for all tenants of social housing in Scotland on 1 August 2016.

4.10 Outgoings

In forming our opinion of the net rental income generated by the portfolio, we have considered the following outgoings:

- bad debts, voids and arrears;
- cost of maintenance and repairs; and
- management and administration expenses.

We emphasise that, under the definitions of the bases of valuation we have been instructed to adopt, we are not valuing the Chargors' stewardship of the stock, rather we are assessing what a hypothetical purchaser in the market would pay for the stock, based on the market's judgement of the capabilities of the portfolio.

The assumptions we have made in our appraisal reflect our opinion of the view the market would adopt on the future performance of the portfolio. In forming our opinion, we have had regard to other recent valuations we have undertaken of comparable stock.

4.11 Bad Debts and Voids

Within our EUV-SH valuation of the social rented stock we have included an average annual provision for rent loss to voids and bad debts of between 1.25% and 2.50% of the gross rental income.

In our MV-T valuations, the annual provision for rent loss to voids and bad debts has been increased to 5.00% long term to reflect the higher tenant turnover normally associated with market rented properties. This is for all tenure types where applicable.

In addition to the ongoing Welfare Reform agenda announced by the UK Government, there are also legislative provisions with regard to under occupation, and the methods by which Housing Benefit payments will be made and these, combined with the proposed rent increases, may add to future arrears, bad debts and void costs. We have taken the view that most RSLs should be able to manage this change, but there is a risk of some impact on void and bad debt levels.

4.12 Management Costs

Management costs have been included in the valuation on the basis of a competitive bid from an alternative RSL, and our assessment of typical private sector costs.

In our valuations on the basis of EUV-SH we have adopted rates of between £700 and £750 per unit for management and administration, depending on the age and type of property. The exception to this are the Care Homes and Homelink units where between £500 and £1,100 per unit has been applied. We have increased management costs by 0.5% in real terms per annum.

We have assumed that a mortgagee in possession would expect to spend approximately 8% of rental income on management and administration in our valuations on the basis of MV-T, subject to a minimum level based on our EUV-SH assumptions.

4.13 Sheltered Units- Service Charges

The running costs associated with providing the warden service and maintaining the common facilities to the sheltered housing schemes are partly funded through additional service charges levied on the tenants, and partly through Supporting People income from the some or all of the local authorities.

The Chargors have informed us that the income received is intended to cover the annual cost of providing these services and should therefore be regarded as cost neutral. Indeed, the Chargors, like other similar RSLs in the sector, have implemented a de-sheltering programme to mitigate against this. We are aware, however, that there remains some uncertainty about the future of the Supporting People income but have assumed that any loss will be made up by cost savings or an increased level of rent/service charge.

4.14 Service Provision Costs

We understand that the Chargors provide their tenants with additional services that are not recovered by way of an additional service charge. We have made allowances of up to £801 per unit for the additional cost of providing these services in our EUV-SH cashflow models where applicable. These services include provision of the following:

- communal electricity charges (stairwell lighting);
- stairwell cleaning;
- back court maintenance; and
- other environmental services.

We have assumed that the cost of providing these services will increase in line with inflation in each year in our cashflow.

4.15 Repairs and Maintenance

In 2022 JLL was commissioned to begin an annual rolling stock validation exercise of a selection of the Chargors' portfolio. The purpose was firstly to confirm the component replacement data that is contained within the Chargors' property management system and secondly, to verify their projected 30-year business plan and cost assumptions. This supersedes the previous 5-year stock condition regime. In the case of the most recent 2023 JLL stock validation exercise, we agreed with at least 97% of the information contained within the Chargors' property management system in terms of main component replacement items. As such and for the purposes of this valuation exercise, we have adopted the Chargors' business plan cost profile within our valuation model but have made an allowance of 5% and 20% for professional fees and VAT respectively.

In addition, we have been advised by the Chargor that five multi-storey blocks are due to have two new lifts installed in each block at an estimated cost of c.£725k per block inclusive of VAT. We have had regard for these costs in our valuation.

In addition, we have assumed that each low-rise and medium-rise property have a useful economic life of 50 years and the high-rise properties a useful economic life of 30 years, providing that the properties are properly maintained in the future.

We have assumed that the properties are in a reasonable state of repair and we are satisfied that the planned maintenance costs included within the valuation, in conjunction with our annual provisions for cyclical and responsive maintenance, should be sufficient to keep the properties in good and tenantable condition throughout the period of our valuation cashflows.

As part of our normal information gathering, we specifically asked the Chargors if they were aware of any ongoing structural, environmental, or contamination issues affecting the properties being valued, and they have advised us that they are unaware of any such problems.

The table below sets out the various average assumptions we have made in the first year of our cashflows. Both of our appraisals assume that these costs will inflate at 0.5% (real) per annum:

Category of Expenditure	EUV-SH	MV-T
Major repairs and renewals – Year 1	£0 - £32,725 (£3,826 average)	£0 - £32,725 (£3,826 average)
Major repairs and renewals – 30 Year average	£36,289	£36,289
Cyclical repairs - Year 1	£400 - £450	£400 - £450
Day-to-day repairs - Year 1	£500 - £750	£500 - £750

A summary of the average 30-year planned maintenance programme costs that we have adopted in our cashflows is summarised by company in the table below:

Category of Expenditure	EUV-SH and MV-T
Loretto	£30,342
Wheatley Homes East	£36,940
Wheatley Homes Glasgow	£45,681

In our MV-T valuations, in order to reflect the higher tenant turnover normally associated with market rented properties, we have included an additional allowance of £50 per unit per annum for responsive & voids maintenance.

In preparing our valuation of the multi-storey units we have assumed the useful economic life of the high-rise units to be at least 30 years, providing that they continue to receive the level of programmed work investment outlined in the 30-year cost data provided in the tables above.

The costs for the multi-storey units are inclusive of an additional provision in the final year of our cashflow for further refurbishment or demolition of the blocks. The allowance we have made in our cashflow equates to £12,500 per unit within each block.

4.16 Discount Rate

Our cashflow valuations are based on constant prices and therefore explicitly exclude inflation. The chosen discount rate reflects our judgement of the economic conditions at the time of the valuation and the level of risk involved in each cashflow, taking all factors and assumptions into account. To determine the risk involved we have looked at:

- the sustainability of the existing rental income;
- the likely rate of future rental growth;
- the condition of the portfolio;
- the level of outgoings required to maintain the maximum income stream;
- the likely performance of the portfolio in relation to its profile and location;
- the real cost of borrowing; and
- the long-term cost of borrowing.

For our EUV-SH valuations of the social rented properties we have adopted a real discount rate of between 5.75% and 6.50% on net rental income. The exception to this, are the Care Homes and Homelink units where a discount rate of between 10.00% and 15.00% has been applied.

In our MV-T model we have adopted a higher rate on rental income to reflect additional risk resulting from the significant rental growth that we have assumed during the first 3 years. In addition, we have adopted the same higher rate on income from sales to reflect the yield which an investor would expect from a sales income stream.

We have adopted real discount rates of between 7.00% and 10.00% for our MV-T cashflows.

4.17 House Price Growth

Our valuation model assumes the following real house price growth:

| Capital Value |
|---------------|---------------|---------------|---------------|---------------|
| Growth yr 1 | Growth yr 2 | Growth yr 3 | Growth yr 4 | Growth yr 5+ |
| 0.0% | 0.0% | 2.0% | 3.1% | |

5 Valuation Commentary - Shared Ownership

5.1 Introduction

There are 30 shared ownership properties within the portfolio.

- Assumptions have been made in order to arrive at the valuation of the Heritable Interest of the Housing Stock.
- All tenants initially purchase a minimum Equity Share of an Heritable interest of their dwelling unit, with an option to purchase additional Shares up to 100%, where permitted.
- Annual rent increases are in line with the Retail Price Index or such other increases as may be included in the Rental Policy of the Chargors. The valuation further assumes that rents are capable of being reassessed by an independent valuer at market level. Should no provision for reassessment of the rent at market level be possible then the valuation will require to be recalculated using a continuous social rent level and this is likely to result in a significantly lower staircasing projection.
- The Chargors are required to notify the Funder and obtain their consent prior to authorising and validating a 'Staircasing' or similar Equity Share transaction. We have assumed that the proceeds of 'Staircasing' will go directly to the Funder for apportionment on an agreed basis as determined in any Funding Agreement.
- The rent is paid by tenants on a pro-rata basis in contrast to the remaining share of the Heritable interest. The Chargors will be responsible for payment of Building Insurance premiums which will be recovered from the tenants in full via a service charge which would also include any further services provided, such as common maintenance, warden services, landscape maintenance etc.
- The value of each Equity Share assumes no special purchaser status or payment of a premium and is calculated as a straight percentage of the scheme's average unit capital value at the respective year.
- Sale prices of Shares in units are net of disposal costs and no allowance has been made for any tax on disposal.
 Valuation survey and legal fees are covered in full by the tenant at the time of any initial and subsequent acquisition of Shares of their property interests.
- House occupiers are responsible for both their internal and external repairs however in the case of some flatted developments, occupiers may be covenanted to upkeep their accommodation internally only and external repairs may be managed by the Chargors with costs charged as part of any Service Agreement.
- Reactive repairs, long term planned maintenance and major repair liabilities for communal areas or in the case
 of flats for the external fabric, have been included in the valuation where necessary on the basis of actual
 historical costs and our assessment of future costs.

All properties are treated as being occupied at the time of valuation with each occupier's Equity Share ownership either reflecting the actual circumstance at the time of our valuation or the Chargors' Sales Policy.

6 Valuation

6.1 Background

We have prepared our valuations on the following bases:

- Existing Use Value for Social Housing ("EUV-SH"); and
- Market Value subject to existing Tenancies ("MV-T").

Our valuations have been prepared in accordance with the RICS Red Book.

Apportionments of the valuations have been calculated as arithmetic apportionments and are included in the schedules at Appendix 1. This is a portfolio valuation, and no valuation of individual properties has been performed.

In forming our opinion of the value of the portfolio as a whole, we have neither applied a discount for quantum nor added a premium to reflect break-up potential.

The definitions of the bases of valuation are set out in full in section 7 of this report.

6.2 Asset Value for Loan Security Purposes

Our valuation of the 3,417 properties being valued on the basis of Existing Use Value for Social Housing ("EUV-SH"), in aggregate, at the valuation date is:

£159,210,000 (one hundred and fifty nine million, two hundred and ten thousand pounds)

Our valuation of the 4,151 properties being valued on the basis of Market Value subject to Tenancies ("MV-T" and the "MV-T Properties"), in aggregate, at the valuation date is:

£316,120,000

(three hundred and sixteen million, one hundred and twenty thousand pounds)

6.3 Asset Value by Tenure

The following table summarises our opinions of value:

Chargor	Basis of Valuation	Units	EUV-SH	MV-T
Loretto	EUV-SH	546	£27,780,000	-
Loretto	MV-T	1,166	-	£77,550,000
Wheatley Homes East	EUV-SH	20	£790,000	-
Wheatley Homes East	MV-T	272	-	£22,820,000
Wheatley Homes Glasgow	EUV-SH	2,851	£130,640,000	-
Wheatley Homes Glasgow	MV-T	2,713		£215,750,000
Total		7,568	£159,210,000	£316,120,000

7 Bases of Valuation

Our valuations have been prepared in accordance with the RICS Red Book.

7.1 Existing Use Value for Social Housing

The basis of Existing Use Value for Social Housing is defined in UK VPGA 7 of the RICS Valuation Global Standards – UK National Supplement as follows:

"Existing use value for social housing (EUV-SH) is an opinion of the best price at which the sale of an interest in a property would have been completed unconditionally for a cash consideration on the valuation date, assuming:

- a willing seller;
- that prior to the valuation date there had been a reasonable period (having regard to the nature of the property and the state of the market) for the proper marketing of the interest for the agreement of the price and terms and for the completion of the sale;
- that the state of the market, level of values and other circumstances were on any earlier assumed date of exchange of contracts, the same as on the date of valuation;
- that no account is taken of any additional bid by a prospective purchaser with a special interest;
- that both parties to the transaction had acted knowledgeably, prudently and without compulsion;
- that the property will continue to be let by a body pursuant to delivery of a service for the existing use;
- the vendor would only be able to dispose of the property to organisations intending to manage their housing stock in accordance with the regulatory body's requirements;
- that properties temporarily vacant pending re-letting should be valued, if there is a letting demand, on the basis that the prospective purchaser intends to re-let them, rather than with vacant possession; and
- that any subsequent sale would be subject to all the same assumptions above."

7.2 Market Value

The basis of Market Value is defined in VPS 4.4 of the Red Book as follows:

"The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion."

Market Value subject to Tenancies is in accordance with the above definition, with the addition of the point below.

7.3 Expenses

No allowance is made in our valuations for any expenses of realisation.

7.4 Tax

No allowance is made in our valuations for any liability for payment of Corporation Tax, or for any liability for Capital Gains Tax, whether existing or which may arise in the future.

The transfer of properties between RSLs is exempt from Stamp Duty Land Tax ("SDLT").

7.5 VAT

Our valuations are exclusive of VAT on disposal.

8 Sources of Verification of Information

8.1 General

We have relied upon the description, tenancy type and current rental income provided to us by the Chargors and we have been unable to verify the accuracy of that data.

8.2 Tenure

We have assumed that the Chargors hold Heritable interests (Scottish equivalent of English freehold) in these properties.

8.3 Title

We have reviewed the certificates of title prepared by Brodies LLP dated 28 November 2014 and the certificate of title prepared by Pinsent Masons LLP dated 12 December 2018 and the reliance letter in connection therewith dated 22 January 2025 (together, the "Property Documents") and can confirm that our valuations fully reflect the disclosures contained therein.

In respect of each property that we have valued on the basis of MV-T we confirm that we have reviewed the Property Documents and confirm that each such property can be disposed of on an unfettered basis (subject only to existing tenancies disclosed in the Property Documents but not subject to any security interest, option of other encumbrance or to any restriction preventing or restricting its sale to or use by any person for residential use).

8.4 Nomination Agreements

Our valuations are prepared on the basis that there are no nomination agreements. If any nomination rights are found to be in existence, they are assumed not to be binding on a mortgagee in possession unless otherwise stated in this report.

8.5 Measurements/Floor Areas

We have not measured the properties, this being outside the scope of a valuation of a portfolio of this nature, unless otherwise stated in this report.

However, where measurements have been undertaken, we have adhered to the RICS Code of Measuring Practice, 6th edition, except where we specifically state that we have relied on another source. The areas adopted are purely for the purpose of assisting us in forming an opinion of capital value. They should not be relied upon for other purposes nor used by other parties without our written authorisation.

Where floor areas have been provided to us, we have relied upon these and have assumed that they have been properly measured in accordance with the Code of Measuring Practice referred to above.

8.6 Structural Surveys

Unless expressly instructed, we do not carry out a structural survey, nor do we test the services and we, therefore, do not give any assurance that any property is free from defect. We seek to reflect in our valuations any readily

apparent defects or items of disrepair costs of repair which are brought to our attention. Otherwise, we assume that each building is structurally sound and that there are no structural, latent or other material defects.

In our opinion the economic life of each property should exceed 50 years providing the properties are properly maintained.

8.7 Deleterious Materials

We do not normally carry out or commission investigations on site to ascertain whether any building was constructed or altered using deleterious materials or techniques (including, by way of example high alumina cement concrete, woodwool as permanent shuttering, calcium chloride or asbestos). Unless we are otherwise informed, our valuations are on the basis that no such materials or techniques have been used.

8.8 Reinforced Autoclaved Aerated Concrete ("RAAC")

The Scottish Housing Regulator published updated information on the 12th November 2024 regarding the presence of reinforced autoclaved aerated concrete (RAAC) in social housing.

Following further updates from landlords, 145 social landlords have now confirmed that there is no RAAC present in their tenants' homes. Sixteen landlords have identified the presence of RAAC in some of the homes they provide to tenants, with 2,445 homes affected and a further 667 homes are currently under investigation.

8.9 Site Conditions

We do not normally carry out or commission investigations on site in order to determine the suitability of ground conditions and services for the purposes for which they are, or are intended to be, put; nor do we undertake archaeological, ecological or environmental surveys. Unless we are otherwise informed, our valuations are on the basis that these aspects are satisfactory and that, where development is contemplated, no extraordinary expenses, delays or restrictions will be incurred during the construction period due to these matters.

8.10 Environmental Contamination

Unless expressly instructed, we do not carry out or commission site surveys or environmental assessments, or investigate historical records, to establish whether any land or premises are, or have been, contaminated. Therefore, unless advised to the contrary, our valuations are carried out on the basis that properties are not affected by environmental contamination. However, further reasonable enquiries during the preparation of the valuation lead us to believe that the land is likely to be contaminated we will discuss our concerns with you.

8.11 Japanese Knotweed

Our inspections are for valuation purposes only and carried out on an external and internal sample basis only, therefore we cannot confirm whether invasive vegetation has been or is present on the site, our valuation assumes that none exists within the demise or proximity of any of the properties.

8.12 Energy Performance Certificates (EPCs)

The Energy Efficiency Standard for Social Housing (EESSH Phase 1 and 2) aims to improve the energy efficiency of social housing in Scotland. The standard will also contribute to reducing carbon emissions by 56% by 2020, 75% by

2030, 90% by 2040 and net-zero emissions of all greenhouse gases by 2045, in line with the requirements set out in the Climate Change (Emissions Reduction Targets) (Scotland) Act. The EESSH is based on the minimum Energy Performance Certificate (EPC) rating which in turn are calculated using the Standard Assessment Procedure (SAP) for energy rating of dwellings.

The EESSH Review Group was established in March 2017 and has set an EESSH 2 milestone of EPC Band B for social housing by 2032. It has also been agreed that no social housing should be re-let below EPC Band D from December 2025, subject to temporary specified exemptions.

8.13 SHQA & EESG

In 2004, The Scottish Government issued guidance on the introduction of the Scottish Housing Quality Standard (SHQS), giving details of the content of the Standard and setting a target date of 2015 for bringing houses up to this Standard. To meet the Standard, the house must be:

- compliant with the tolerable standard;
- free from serious disrepair;
- energy efficient;
- provided with modern facilities and services; and
- healthy, safe and secure.

As per the 2023/24 Scottish Housing Regulator submission by Wheatley Group we note the following SHQS Ratings for its subsidiaries:

Category of Expenditure	EUV-SH and MV-T
Loretto	99.9% met the SHQS compared to the Scottish average of 84.4%.
Wheatley Homes East	99.5% met the SHQS compared to the Scottish average of 84.4%.
Wheatley Homes Glasgow	99.6% met the SHQS compared to the Scottish average of 84.4%.

The Energy Efficiency Standard for Social Housing (EESSH/EESSH2) was a mandatory standard for Social Landlords to meet by 2020 (EESSH2 by 2032), and was brought into force by the Scottish Government in March 2014. EESSH succeeds the targets and guidance in the Scottish Housing Quality Standard (SHQS), and superseded the SHQS from 2015. The Standard aims to improve the energy efficiency of social housing and reduce energy consumption, fuel poverty, and the emission of greenhouse gases.

The SHR monitors and reports on Social Landlords compliance with the EESSH and from 2015/16 expects all Social Landlords to submit data on an annual basis to them on their compliance with the standard. Whilst Social Landlords are not expected to produce 100% EPCs for EESSH compliance purposes they may however choose as good practice to work towards this target. At this time and we have not made provision for any additional cost potentially arising out of EESSH/EESSH2, as we have assumed that the properties will be brought up to standard by way of active management/the ongoing investment programme by the 2032 EESSH2 milestone/deadline. EESSH2 is currently under review and current milestones are on hold.

8.14 Insurance

Unless expressly advised to the contrary we assume that appropriate cover is and will continue to be available on commercially acceptable terms.

8.15 Planning

We have prepared our valuations on the basis that each property exists in accordance with a valid planning permission.

8.16 The Equality Act

We have assumed the properties appear to comply with the requirements of the Equality Act 2010.

8.17 Outstanding Debts

In the case of property where construction works are in hand, or have recently been completed, we do not normally make allowance for any liability already incurred, but not yet discharged, in respect of completed works, or obligations in favour of contractors, subcontractors or any members of the professional or design team.

8.18 Services

We do not normally carry out or commission investigations into the capacity or condition of services. Therefore, we assume that the services, and any associated controls or software, are in working order and free from defect. We also assume that the services are of sufficient capacity to meet current and future needs.

8.19 Plans and Maps

All plans and maps included in this report are strictly for identification purposes only, and, whilst believed to be correct, are not guaranteed and must not form part of any contract. All are published under licence and may include mapping data from Ordnance Survey © Crown Copyright. All rights are reserved.

8.20 Compliance with Building Regulations and Statutory Requirements

Our valuations have been provided in accordance with the RICS' Guidance Note: "Valuation of properties in multi-storey, multi-occupancy residential buildings with cladding, 1st Edition March 2021", effective from 5 April 2021.

Unless otherwise stated in this report none of the properties are of 11m or 5 storeys or more or are subject to any remedial works in the wake of the Grenfell Tower disaster of June 2017. We have therefore assumed that the properties conform to the Fire Precaution Regulations and any other statutory requirements.

Housing Market Commentary

UK House Price Index figures for November 2024

Three key figures for November 2024:

- The average price of a property in Scotland £195,000;
- The annual price change of a property in Scotland 4.7%; and
- The monthly price change of a property in Scotland -0.8%.

Estimates for the most recent months are provisional and are likely to be updated as more data is included. The House Price Index for 2024 reflects transactions that took place up to the end of November 2024.

The latest HPI for Scotland show the average price of a property in Scotland in November 2024 was £195,000, an increase of 4.7% when compared to November 2023.

Compared to the previous month, house prices in Scotland decreased by 0.8% on a non-seasonally adjusted basis, whilst on a seasonally adjusted basis there was a decrease of 0.1%.

The UK average house price was £290,000 which was an annual increase of 3.3% on November 2023. Compared with the previous month, UK house prices decreased by 0.4% on a non-seasonally adjusted basis and increased by 0.1% on a seasonally adjusted basis.

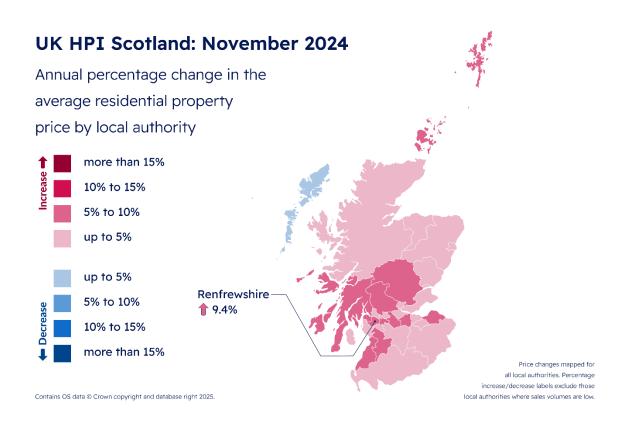

The volume of residential sales in Scotland in September 2024 was 8,360. When compared with the first published figures for September 2023 this was an annual decrease of 0.3%. Published transactions for recent months will increase as later registered transactions are incorporated into the index.

The table below provides Scotland house prices and annual changes by property type.

Property type	House price level (£)	Annual house price percentage change
Detached	£345,000	5.3%
Semi-detached	£208,000	5.3%
Terraced	£166,000	5.7%
Flats or Maisonettes	£135,000	3.6%

Average prices for Local Authorities are based on a 3-month moving average to help remove some of the volatility in the series. Increases were recorded in 31 out of 32 local authority areas, when comparing prices with the previous year. The largest increase was in Renfrewshire where the average price increased by 9.4% to £171,000. The smallest increase was recorded in North Ayrshire, where the average price increased by 1.4% to £133,000. The only decrease occurred in Na h-Eileanan Siar, however Orkney Islands, Na h-Eileanan Siar and Shetland Islands are not considered when highlighting which local authorities have experienced the highest/lowest increase, due to the very low numbers of sales transactions in these local authorities which can lead to volatility in the series.

In November 2024, the highest-priced area to purchase a property was City of Edinburgh, where the average price was £334,000. In contrast, the lowest-priced areas to purchase a property was East Ayrshire, where the average price in both was £130,000.

Further information on HPI Scotland by local authority, property type, first time buyers and cash sales can be found in the latest HPI Scotland publication. Visualisations can be found the ONS Housing prices in your area page.

As with other indicators in the housing market, which typically fluctuate from month-to-month, it is important not to put too much weight on one month's set of house price data.
